# **Construction Cost Index for Dwellings**

## First quarter, 2024

**Tirana, on 4 June 2024:** Construction Cost Index for Dwellings in the first quarter 2024 arrived 112.0 against fourth quarter 2021 as reference period. The annual rate of Construction Cost Index for Dwellings in first quarter 2024 is 3.4 %, a year before this rate was 5.3 %.

**Yearly rates of main groups:** Compared with the first quarter of 2023, the largest increase is observed in the group "Energy expenditures" by 7.5 %, followed by groups "Salary expenditures" by 4.4 %, "Transport expenditures" by 3.7 %, "Other expenditures" by 2.7 %, "Material expenditures" by 2.5 % and "Machinery expenditures" by 1.5 %.

Inside the group "Material expenditures", the index of the subgroup "Construction materials" marked the highest increase by 2.6 %, followed by "Hydro sanitary materials" by 2.5 % and "Electric materials and communication" by 2.1 %.

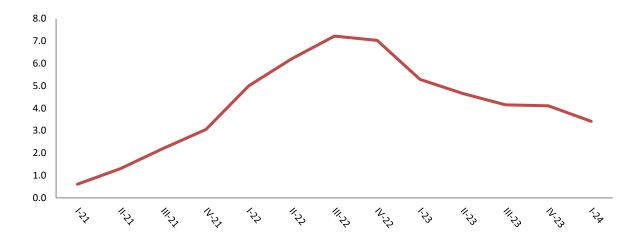

Fig. 1 Annual changes of Construction Cost Index for Dwellings

**Quarterly rates of main groups:** Compared with the previews quarter, Construction Cost Index for Dwellings, in the first quarter of 2024 increased by 0.5 %. The largest increase is observed in "Other expenditures" by 1.2 %, followed by groups "Energy expenditures" by 1.1 %, "Salary expenditures" and "Transport expenditures" by 0.8 % each of them, "Machinery expenditures" by 0.4 % and "Material expenditures" by 0.1 %.

## Tab. 3 Quarterly changes of Construction Cost Index for Dwellings

## Methodology

The Construction Cost Index (for dwellings) (CCI) starting in the first quarter of 2024 will be calculated with the new base. Fourth quarter 2021 will serve as the baseline period for index calculation (fourth quarter 2021 = 100).

CCI measures the price development of the production factors raw materials labour, machinery, transports, energy and other costs that are used in building projects. The CCI is an important economic indicator for the construction sector. The main users of Construction Cost Index is used as a deflator for the calculation of Gross Domestic Product and various volume indexes used by Government Institutions, Central Bank of Albania other Non-Governmental Organizations, World Bank, International Monetary Foundation etc. The weight of the material basket is calculated based on estimated cost for the construction of a multi-storey dwelling taken from construction firms. The new basket contains 71 items of which 66 are construction materials. The prices for construction materials are collected from 237 distributors and retailers of construction materials. The data for salaries, machineries and transport are collected in 97 biggest construction companies concentrated mostly in Tirana. The selection of companies is based on classification of EUROSTAT for Construction Cost Index. The new CCI have six expenditure groups:

- Material Expenditures
- Salary Expenditures
- Machinery Expenditures
- Transport Expenditures
- Energy Expenditures
- Other expenditures

### Revision

Indexes may be revised due to several reasons: additional information, the methodological changes, change of base period, etc.

### Measure of index

The annual rate measures the price change between current quarter and the same quarter of the previous year.

The quarterly change measures the price between current quarter and previous quarter.
